## 1. Random Quotes

Press the button as many times as you like. Each time, a new **quote** should replace current one on screen. You can add as many **quotes** as you want into the **quotes** array. Take a look at an **overview** of our entire **project** files side by side that make up this **Random Quote** Generator.

2. Number into Word Converter

To get a **number converted** to **words** you just need to call the function passing it the **number** you want to **convert** and the corresponding **words** will be returned.

3. Weather Report

JavaScript fetches data from openweathermap.org (no affiliation) and makes you can access the current weather conditions and the forecast for any city.
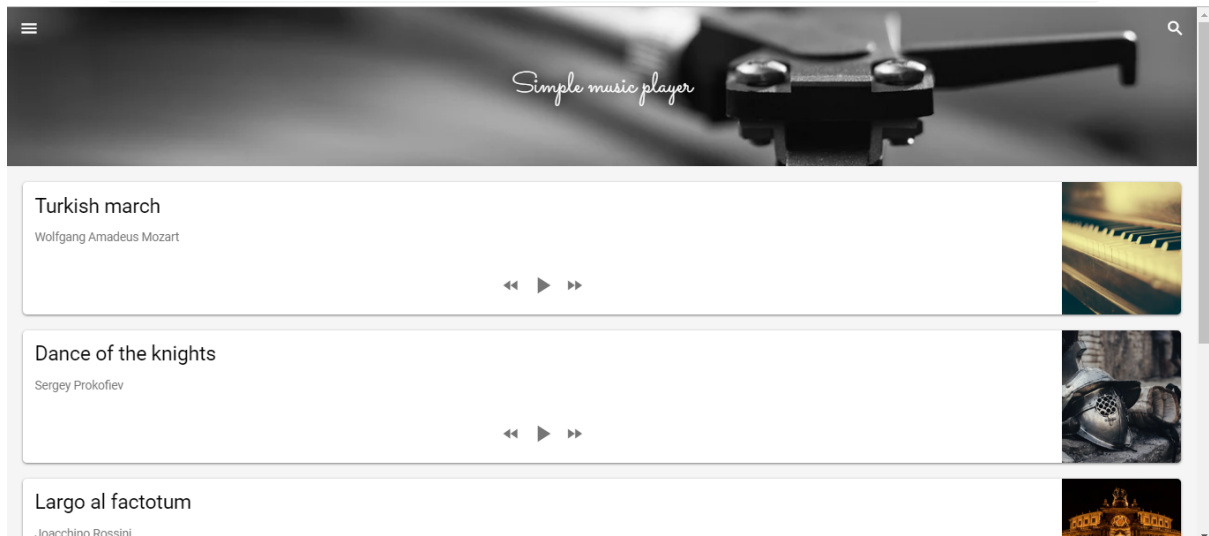

Fetching weather data is a perfect way to get your feet wet. use the browsers built in fetch with JavaScript to grab data from OpenWeatherMap's API.
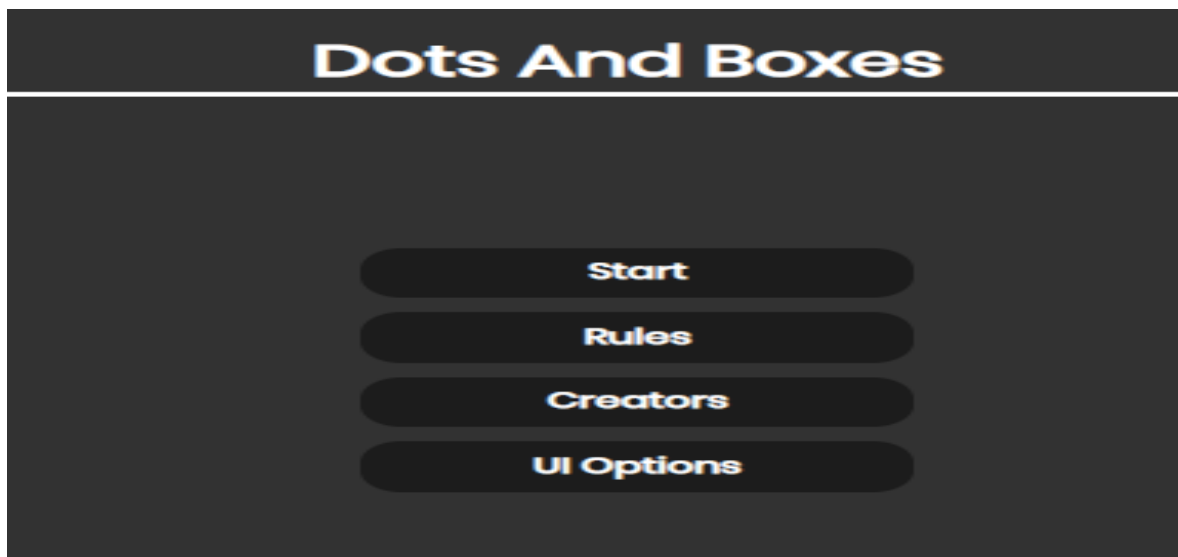

4. Word and Char Count

Calculate and display the number of characters and also the number of words within a TEXTAREA.
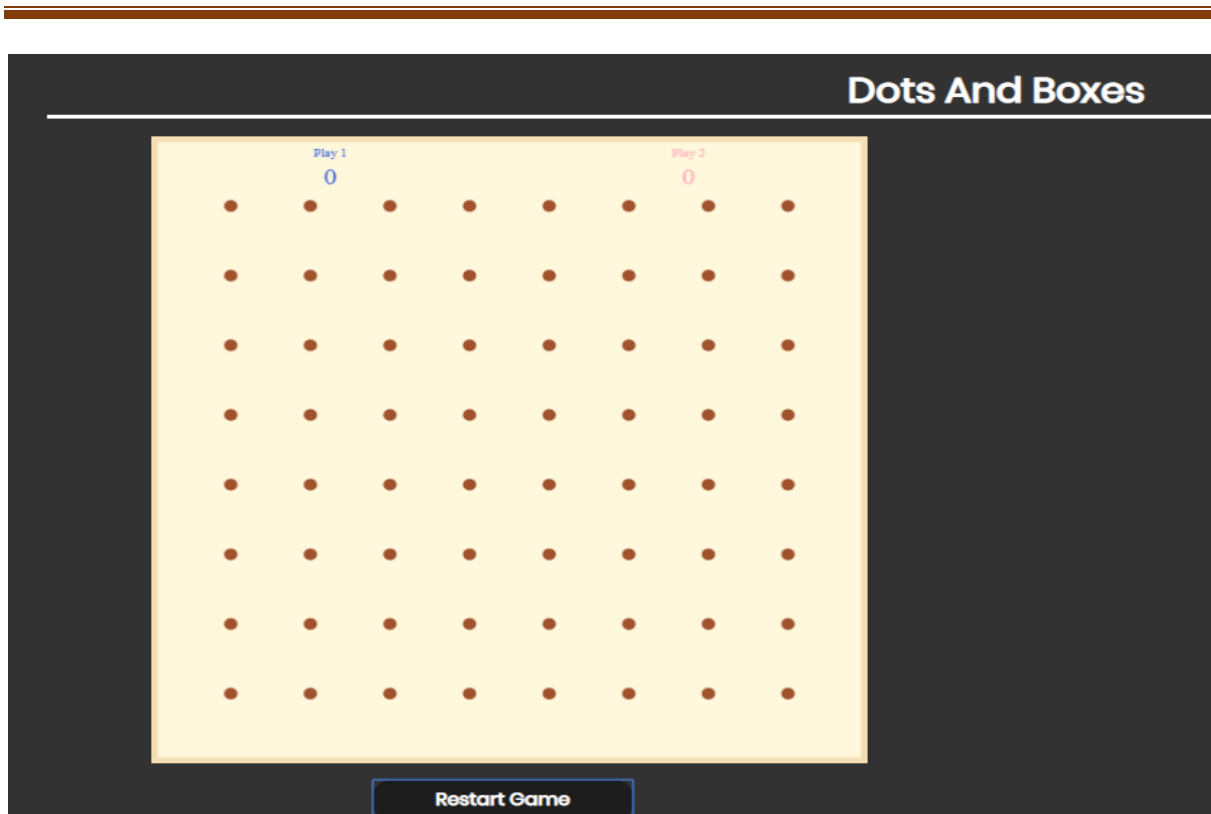

5. Music Player

An **audio player** with play and pause buttons .Use the controls property to display audio controls (like play, pause, seeking, volume, etc…

6. Dot and Box

The player who has its turn to play can add a single horizontal or vertical line between two un joined adjacent dots. In this move, if the player completes the fourth side of a box then the player owns that box, earns one point and takes another turn. Otherwise, the alternate player takes next turn to play. When a box is owned by some player, it's filled with the corresponding player's colour. The game ends when no more lines can be placed.
